

Funded Trading: How To Leverage \$50 to \$5000 in 7 trading days

WHY NEW TRADERS STRUGGLE TO START

If you're curious about trading but not sure where to begin, you might be thinking:

- "How much money do I need to start?"
- "What if I lose it all before I even learn how this works?"
- "Is there a way to get real experience without taking big risks?"

These are smart questions and more common than you think.

The truth is, many people **never** get started because they assume they need **thousands** of dollars and years of experience. But that is NOT TRUE. There is a different path that beginners can explore: funded trading through a prop firm.

WHAT IS A PROP FIRM AND HOW DOES IT WORK?

A prop firm (short for "proprietary trading firm") gives you access to a large trading account—sometimes \$50K, \$100K, or even more—if you can pass a simple evaluation. You trade with their money, not yours, and keep a portion of the profits you make.

This model is designed for people who:

- Want to learn in a structured environment
- Don't want to risk personal savings
- Are ready to commit and follow basic risk rules

You don't need to be an expert to get started. Prop firms are ideal, in fact, for beginners who want to learn responsibly.

IS THIS A GOOD FIRST STEP INTO TRADING?

1. Define What You Want

- "Do you want to learn trading without risking thousands up front?"

2. Avoid Common Mistakes

- "Many new traders blow their own money before they even learn the basics. This lets you practice with structure."

3. Start with an Evaluation

- "You're asked to follow a few simple rules—like managing risk and hitting a modest profit target. Think of it like a trading test."

4. You're Not Alone

<https://app.alpha-futures.com/signup>

- "These firms only benefit when you succeed. They provide the rules and support so you can grow."

5. Take the First Step

- "If you're ready to give trading a shot the smart way, click the link, use my code for a discount, and start your evaluation."

PROP FIRM BASICS: ALPHA FUTURES OVERVIEW

Account Options:

- Choose from \$50K, \$100K, \$150K, or \$200K accounts.

You can copy your trades on different accounts and **multiply** your profits

To Pass the Evaluation, You'll Need To:

1. Reach a Profit Target — For example, \$3,000 on a \$100K account.
2. Stay Within Daily Limits — Don't lose more than the allowed daily amount (e.g., \$1,000).
3. Protect Your Account Balance — Avoid dropping more than a fixed amount from your peak balance.
4. Trade for at Least 2 Days — Show consistency over time, not just a lucky streak.

Once You Pass:

- You get a real, funded trading account.
- You keep 90% of any profits you make.
- You can request withdrawals after 5 trading days.

WHY THIS MATTERS FOR NEW TRADERS

Prop firms offer a clear, low-risk way to get into trading. If you're just starting out and want to learn responsibly, with real goals and guardrails, this can be a smart first move.

You don't need to put thousands of your own dollars on the line. You just need to show you can follow the rules—and in return, you get the opportunity to trade with real capital.
